WELCOME

Dear colleagues, transplantation medicine is moving fast and with our busy schedules, we all experience difficulties to keep up to date. In order to address this dilemma the DESCARTES working group on renal transplantation cordially invites you to come to Berlin and participate in a comprehensive 1 day CME course on the latest developments in transplantation.

The course will cover a broad range of hot topics: from actual trends in stem cell research and basic science to latest treatment options for transplanted patients. We will discuss current therapeutic concepts in a variety of challenging patient groups such as obese or pregnant patients. State of the art lectures cover actual therapeutic concepts for difficult to treat patients including patients with FSGS, Hepatitis C, multi-drug resistant bacteria or poor kidney function. A lecture on novel tools to detect non-adherence will enable the participant to better understand this important barrier to long-term success. The course will also provide new insights into allocation and scoring systems and will give an extensive overview on the risks associated with living kidney donation.

For the first time, we are planning ward rounds for 24 young delegates on November 5th. The delegates will visit transplanted patients with experienced transplant nephrologists in small groups at the nearby Charité University Hospital.

The DESCARTES group encourages the audience to submit abstracts on hot topics in renal transplantation (max. 500 words). The three best scored abstracts will be presented during the meeting and awarded with a grant of 1000€, 500€, 250€ in addition to free accommodation and travel. Abstract submission deadline will be October 1st 2016.

Personally I am looking forward to a fantastic educational activity in the heart of Europe. I hope that you are able to come to the vibrant city of Berlin for this outstanding event and join transplant specialists from all across Europe to discuss the latest developments in transplantation medicine with European key opinion leaders.

See you in Berlin
Klemens Budde

Leading European Nephrology

ERA-EDTA CME Course

8.45-9.00 Opening Ceremony
Daniel Abramowicz, Descartes Chairman
Klemens Budde, Germany

Session 1

9.00-9.40 Stem cells: ready to enter in the clinical arena?
Ton Rabelink, The Netherlands

9.45-10.25 Basic science for dummies: what should you know?
Alain Le Moine, Belgium

10.30-10.55 How to manage patients with FSGS at transplantation?
Guillaume Canaud, France

11.00-11.30 Coffee Break

Session 2

11.30-11.55 Comparisons between various allocation systems.
Uwe Heemann, Germany

12.00-12.25 Kidney transplantation for obese dialysis patients.
Gabriel Oniscu, UK

12.30-13.15 Usefulness of scoring systems for assessing suitability to receive a kidney transplant:
PRO, *Rainer Oberbauer, Austria*
CON, *Klemens Budde, Germany*

13.20-14.30 Lunch Break

Session 3

14.30-14.55 Pregnancy in living donors: what are the risks?
Maria Pippias, The Netherlands

15.00-15.25 What is the real risk of kidney failure after living donation?
Umberto Maggiore, Italy

15.30-15.55 What is optimal care for the patient with a failing transplant kidney?
Luuk Hilbrands, The Netherlands

16.00-16.25 The novel anti-HCV treatments before and after transplantation
Nassim Kamar, France

16.30-16.55 Infections before and after transplantation: how to deal with MDR (multi-drug-resistant) bacteria?
Paolo Antonio Grossi, Italy

17.00-17.25 New tools to detect non-adherence.
Sabina de Geest, Switzerland

17.30-18.00 Free communications – the three best scored abstracts

18.00 Closing remarks - *Daniel Abramowicz, Belgium*

19.00 Dinner
