

1ST INTERNATIONAL MILAN NEPHROPATHOLOGY COURSE

COURSE PROGRAM

This three-day course will give an updated overview on the more significant topics in renal pathology.

The eminent faculty of the meeting is composed by nephrologists with exceptional track-record and clinical experience on histopathological issues of native kidney diseases. The course will be articulated through frontal lectures and complementary slide seminars via interactive digital pathology (virtual slides). This course will make an emphasis on morphology and the use of ancillary studies as well as molecular approaches like proteomics, genetics and immunohistochemistry. The targeted audience includes practicing pathologists, renal pathologists and pathology trainees. The course is also opened to nephrologists.

MILAN FASHION WEEK

The course is organized during the September MILAN FASHION WEEK (<http://fashionweekdates.com/>), a clothing trade show established in 1958 and held semi-annually in Milan, Italy. The autumn/winter event is held in February/March of each year, and the spring/summer event is held in September/October of each year. Milan fashion week including more than 40 shows each season transforms the city into a touristic hob by creating various venues for the shows selecting the most elegant and influential palaces to become the stage for design.
