

# Brescia Nephrology 2026: from rare to common

**Brescia**  
**24-25 Settembre 2026**

## Brescia Nephrology 2026: From Rare to Common

### Immune-Mediated and Genetic Kidney Diseases in Focus

*Responsabili Scientifici: Federico Alberici, Claudia Izzi, Federica Mescia*

-----

#### PROGRAMMA PRELIMINARE

##### Giorno 1:

##### 14.30. Systemic diseases and the kidney

- 14.30 – 14.50: Lupus nephritis, the evolving therapeutic scenario
- 14.50 – 15.10: ANCA vasculitis: how many faces?
- 15.10 – 15.30: Diabetic kidney disease, from the immune system to the treatment: how to move forward after SGLT2i, MRAs and GLP1-RA?
- 15.30 – 15.50: Redefining the nephropathology approach to kidney involvement in the context of haematological malignancies
- 15.50 – 16.20: Discussione

##### 16.20 – 16.45: Coffee Break

##### 16.45. Primary glomerulonephritis

- 16.50 – 17.10: IgAN: how to prioritise new therapeutic options
- 17.10 – 17.30: C3 nephropathy: from diagnosis to treatment
- 17.30 – 17.50: Membranous Nephropathy: emerging therapeutics
- 17.50 – 18.20: Discussione

18.20 – 18.50: Lectio Magistralis. Thirty Years of EUVAS: Shaping the Vasculitis Management

##### 18.50 – 19.00: Chiusura prima giornata

# Brescia Nephrology 2026: from rare to common

**Brescia**  
**24-25 Settembre 2026**

Giorno 2:

## **9.00 AM Genetic Kidney Diseases in Adult Nephrology**

- 9.00-9.20 COL4A3/5 heterozygous variants in Idiopathic Nephrotic Syndrome and FSGS
- 9.20-9.40 Genetic Kidney Diseases and SGLT2i
- 9.40-10.00 Fabry Disease insight in therapeutic approaches
- 10.00-10.30 - Discussion

## **10.30 – 11.00: Coffee Break**

## **11.00 AM GENETICS of Autosomal Dominant Polycystic Kidney Diseases (ADPKD)**

- 11.00-11.20 AM - Metabolic reprogramming in ADPKD
- 11.20-11.40 Genotype-Phenotype correlation in ADPKD: insight from the Italian Registry
- 11.40-12.00 Genetic therapeutic approaches in ADPKD
- 12.00 – 12.30 Discussion

## **11.20 AM GENETICS of Autosomal Dominant Tubulointerstitial Kidney Disease (ADTKD)**

- 11.20-11.40 Dissecting ADTKD pathogenetic pathways: the ADTKD-UMOD model
- 11.40-12.00 Autosomal Dominant Tubulointerstitial Kidney Disease (ADTKD): from diagnosis to therapy
- 12.00-12.20 Rare form of Tubulointerstitial Kidney Disease
- 12.20-12.50 Discussion

## **13.00-14.00 Lunch**

# Brescia Nephrology 2026: from rare to common

**Brescia**  
**24-25 Settembre 2026**

**14.00 – 14.30 Lectio Magistralis.** Genetics and Kidney Diseases: what's new.

## **14.30. Immune system, inflammation and the kidney**

- 14.30 – 14.50: Tackling inflammation in Hemodialysis: from the dialysis prescription to emerging therapeutics
- 14.50 – 15.20: From ESAs to Anti-Inflammatory Approaches: Rethinking Anemia Therapy in Chronic Kidney Disease
- 15.20 – 15.50: Therapeutic Strategies for the Removal of Endotoxins and Circulating Cytokines in Patients with Sepsis
- 15.50 – 16.20: Targeting inflammation in Peritoneal Dialysis: Current Challenges and Promising Solutions
- 16.20 – 16.50: Immunosuppressive Regimens and Recurrence of Glomerular Diseases After Kidney Transplantation: Focus on IgAN, MN, FSGS, and aHUS
- 16.50 – 17.20: Discussion

**17.20 – 17.30: Chiusura**
